### GAS POPULAR WITH MANY IN EL PASO

Fifteen Percent of City's Population Uses Gas in Homes.

Fifteen percent of El Paso's population uses gas for heating, or cooking, or lighting. This is proved by the 4125 consumers of the product in El Paso at the present time. El Paso's official population being 39,279.

This shows an increase of 161 gas users since the census was taken five months ago, and indicates to some degree the rapid growth of the city, for figuring five members to the family, as is the usual custom, the total number of new arrivals in the city from other points who are members of families using gas is 805.

Of course the births have been numerous and there are some families which do not use gas in any manner, and therefore no definite information as to the real growth of the city since the census five months ago can be figured from this, but one thing is sure, and that is El Pasoans as a general rule use more gas for its three purposes than many of the larger cities in the country.

### SEWAGE DISPOSAL STILL HANGS FIRE

Bidders on Contract Ask Permission to Use Forfeit Deposit.

The sewage disposal plant proposition is practically in the same stage as when the contract was awarded for the construction to Sorenson & Morgan and W. E. Anderson, city officials stated Monday morning. The difficulty is due to the fact that the plans and specifications call for the erection of the disposal plant proper on Chimalar territory. As the title to the property is in litigation between the United States and Mexico, there is no immediate prospect of work being started, it is believed. Sorenson & Morgan, who deposited a \$5000 check as evidence of good faith, have asked the city to be allowed to use the money until it is decided to begin work. W. E. Anderson is also ready to begin work on his part of the contract and has been since the bids were opened.

### Too Much Water on the Hair a Mistake

(From Toilettes of Today, Paris.)  
"If your hair is becoming dry and brittle, breaking off and losing color, follow the lead of the many who have abandoned the use of soap and water and taken up the new method of dry shampooing," said Claribel Montague in her lecture on "Beauty" at the Theater Monnet, Thursday. "It has been proven beyond question that too frequent wetting and the application of alkaline substance to the hair is a mistake."

"Even those who formerly were devoted to shampooing with eggs now use therox and orris root, and they unhesitatingly declare that this dry shampoo makes the hair as bright and fluffy as ever did eggs."  
"To make the dry shampoo mix four ounces of powdered orris root with four ounces of therox. Sprinkle a tablespoonful of the mixture on the head and brush it well through the hair. Do this once or twice a week if the hair is thin and scanty and you will soon notice a new growth of hair. Nothing will make the hair so beautifully fine and lustrous as this dry shampoo."

### STARTS DIRT LIKE MAGIC

because it contains a dirt-starting ingredient which loosens the dirt quickly, cleanses the fabric with little rubbing, and washes your clothes clean without washing them out.

Because of this dirt-starting feature, Sunny Monday Laundry Soap will save your time and spare your back.

### Washes in any Kind of Water

Hot or cold, hard or soft, luke-warm or boiling waters all look alike to Sunny Monday, and it will do equally good work in each. Moreover, it does not waste away like a rosin soap, and its dirt-starting ingredients remain to the last wafer of the cake.

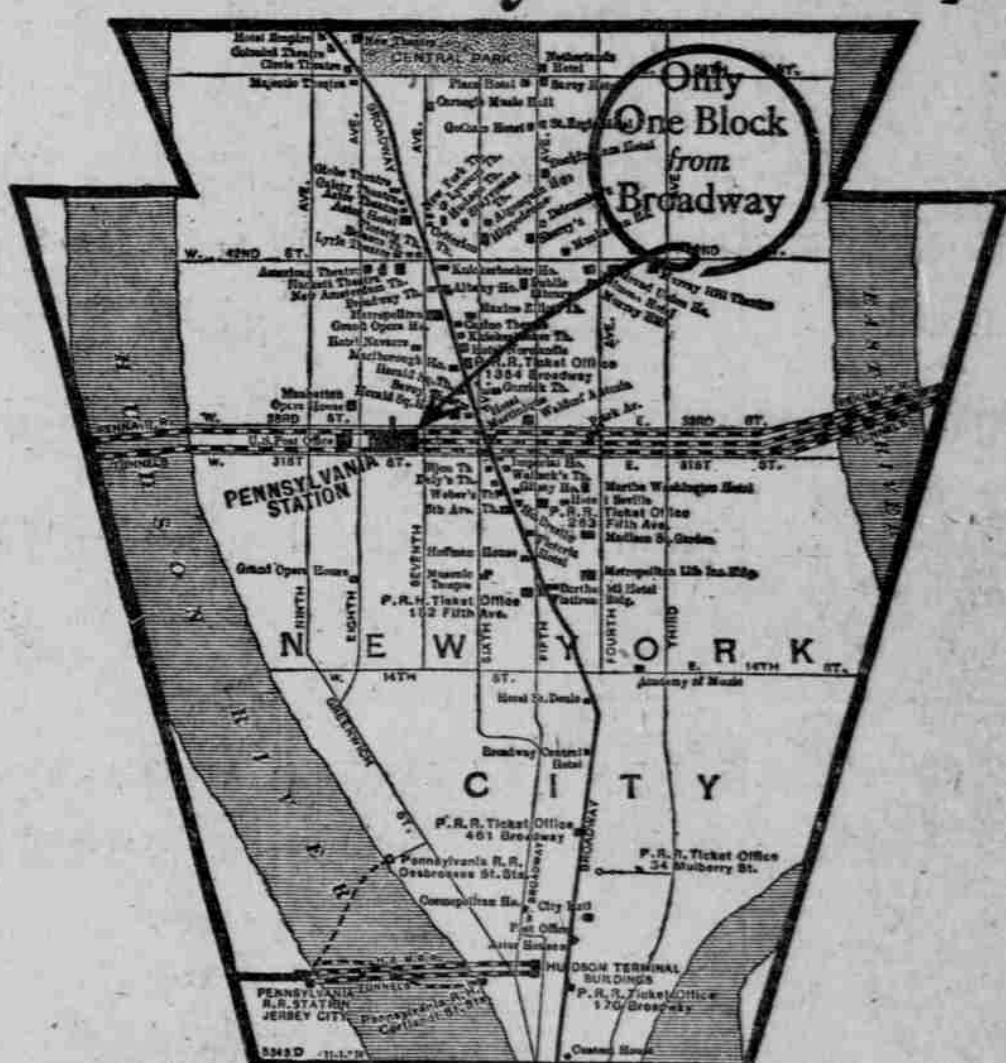

If you're an economical woman—if you're particular about the appearance of your clothes—you should ask your grocer for Sunny Monday and give it a good honest trial.
